

The requirement to scrub names against the do not call list is onerous and unfair. How can I possibly afford to spend over \$7,000 for the complete list when I am a small business. Providing only 5 free Area Code lists does virtually nothing to reduce my costs! I, like many small businesses regularly need dozens of different area codes (in my particular case, I deal with Hawaii property owners - who live all over the country, not in a few clearly bracketted area codes.) There are MANY more of us small business owners whom this rule has DECIMATED!
